COLERIDGE by Woodsman

The new Woodsman Coleridge is the latest edition to our leading range of new generation ultra clean burning log burners. Following on from the highly successful SERENE model, it continues our vision to bring to you the most user friendly, easy to maintain, value for money wood burners which can be installed in even the tightest of clean air zones in the country.

Simplicity is the key and the Coleridge achieves ultra clean burning without the need for fans, or other types of systems which require special operational methods or additional maintenance.

With its sustained burn cycle the new Woodsman Coleridge maximises burn time for each load of fuel giving you a longer burn and a more even comfortable heat compared to traditional low emission burners which burn through fuel faster and produce a more uneven heat output.

The 6mm steel plate cook top is perfect for use during a power outage or to just boil some water for a cup of tea. Consumable parts such as the baffle plate and rear air tubes are constructed from stainless steel for a longer service life and the simple baffle removal system ensures easy servicing for chimney sweeps.
